

DENNIS CHOI

WEB DEVELOPER

ABOUT ME

Hi! I'm Dennis. I'm an exuberant builder and creator of ideas and rockets, and coincidentally also a Web Developer. While I may be a basketball loving connoisseur with a sports marketing background, coding satiated an unparalleled passion for knowledge and community. I find web development incredibly rewarding when my lines of code make creative thought bubbles (ideas) come to life.

PROJECTS

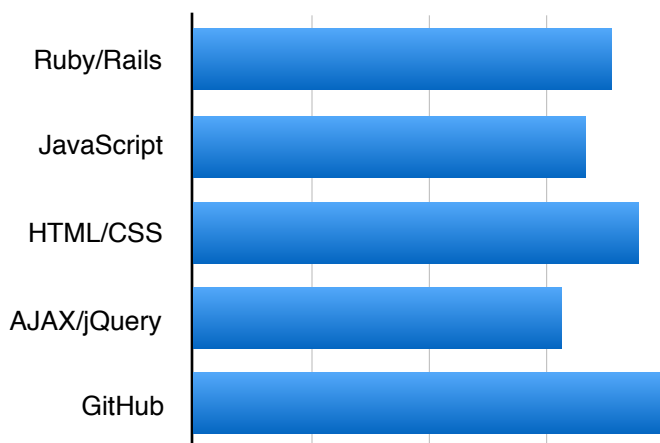

Dindr >> A game that helps you decide what to eat (and matches you onto dates with similar cravings). Role: Back-end (Ruby/Rails, JavaScript) and Front-end (JavaScript, AJAX, Sass, Bourbon).

Crowdfunder >> Awareness for projects/start-ups and an opportunity to be funded by the online community. Role: Back-end (Ruby/Rails, JavaScript/jQuery), and Front-end (CSS / Sass, JavaScript, AJAX).

SeatYourself >> Locate a place to eat near you and make a reservation if it's open and available. Role: Back-end (Ruby/Rails, JavaScript).

TicTacToe >> Play tic-tac-toe on your browser with friends or against a computer! Built with Javascript/jQuery and HTML/CSS.

LANGUAGE & FRAMEWORKS
