DENNIS CHOI

WEB DEVELOPER

DC

ABOUT ME

Hi! I'm Dennis. I'm an exuberant builder and creator of ideas and rockets, and coincidently also a Web Developer. While I may be a basketball loving connoisseur with a sports marketing background, coding opened a vast array of opportunities and community that I was drawn to. To me web development is an incredibly rewarding profession where my lines of code make creative thought bubbles (ideas, see what I did there?) come to life.
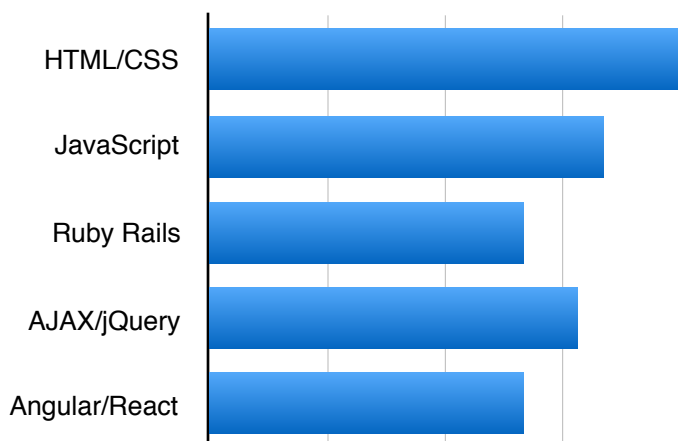

PROJECTS

Clientdesk >> Digitizing the Insurance world with a platform & app that integrates with BMS data. Role: Front-End Developer (HTML/CSS, Angular, React, Bootstrap).

Lee Basketball >> Local Toronto basketball agency. Role: Wordpress Developer

Dindr >> A game that helps you decide what to eat (and matches you onto dates with similar cravings). Role: Back-end (Ruby/Rails, JavaScript) and Front-end (JavaScript, AJAX, Sass, Bourbon).

SeatYourself >> Locate a place to eat near you and make a reservation if it's open and available. Role: Back-end (Ruby/Rails, JavaScript).
